

Quick start guide

1. Go to `indev2.php`, this is the home page for library management system.
2. Here you can search for the book using the search bar provided. You can enter full or partial title, ISBN10, ISBN13 and/ author(s) name.
3. Click the button provided in the table to check-out the book.
4. You will be redirected to checkout page. Here you have to enter a valid `borrow_id` to checkout the book. If the user has already borrowed 3 books, it will be prompted and you will be redirected to homepage.
5. You can go to registrations page to register a new user. After filling in the details and submitting. If the user SSN already exists in the system it will be prompted and you will be redirected to the home page.
6. To checkin a book go to checkin page using the links on the left and click the button next to the book name to check in that book.
7. Click on the fines on the links on the left to go to the fines page. Click on the button provided to pay fine if not payed already.
8. You can use the links on the left side of the page to navigate through the system.
